AMI INCORPORATED • 1500 UNION AVENUE. S. E. • GRAND RAPIDS 2, MICHIGAN

April 8, 1957

BULLETIN NO. 137

TO: All Distributors

SUBJECT: Conversion of 4-Coin Rejector

As shipped from the factory, all phonographs using a four-coin (7900 series) slug rejector will be set so that every nickel through the rejector will close the five-cent coin switch.

If, for some credit combination, it becomes necessary to set the rejector so that only every other nickel will close the switch, the procedure is explained on the attached bulletin from National Rejectors, Inc.

Additional copies of this bulletin may be obtained if desired.
